Summary

I'm a data and analytics professional with hands-on experience delivering production-grade analytics solutions, automation pipelines, and applied machine learning systems in FMCG and manufacturing environments. With proven ability to build scalable Power BI dashboards, Python-based data pipelines, and computer vision models supporting operations across 100+ distributors and 90+ factories nationwide.

Work Experience

The Magnum Ice Cream Company

December 2025 – Now

Data Analyst & Full Stack Developer

- Developed a full-stack Salesman progressive web application, implementing backend logic, database models, and role-based access to support operational workflows and internal reporting.
- Designed multiple Power BI dashboards, including an RLS-enabled enrollment & loyalty monitoring dashboard and a multi-source distributor performance dashboard, improving reporting accuracy and visibility into distributor and outlet behavior.

Unilever Indonesia

December 2024 – December 2025

Data Analyst

- Built a YOLOv8-based machine learning model to verify 100K+ cabinet scans per month, improving salesman compliance and significantly reducing manual verification time. Integrated outputs into Power BI dashboards for faster issue resolution.
- Developed Python automation pipelines for daily, weekly, and monthly operational data, Electronic Purchase Order (EPO) master updates, validations, and month-end replenishment. Reducing manual workload by 13+ hours per week and improving process reliability.
- Contributed to change management for an end-to-end platform migration supporting distributor digitalization. Supporting cross-team system integration, testing (UAT) on new systems or modifications to existing systems, and also leading device distribution and payment tracking with external partners across 100+ distributors.

Asia Pulp & Paper

June 2024 – December 2024

Full Stack & Power BI Developer Intern

- Developed a full-stack reporting web application used by 90+ APP factories nationwide, featuring an integrated inline dashboard and a normalized MySQL database schema, streamlining data access, submission, and referential integrity across Indonesia.
- Utilized Power BI to create interactive dashboards that enhanced data readability and enabled users to perform deeper and more intuitive analysis.
- Supported manpower planning and optimization by analyzing workforce data across regions to determine optimal manpower requirements.

Badan Pusat Statistik

March 2022 – April 2022

Operations & Data Intern

- Handled data cleaning, data entry, and payroll calculations to support supply chain and operations.
- Automated the creation of 1,000+ envelope front covers, reducing manual workload and improving operational efficiency.

Education

Bachelor of Mathematics, State Islamic University Syarif Hidayatullah Jakarta

2019 - 2024

GPA: 3.66 / 4.00

Thesis Paper: Bitcoin Price Prediction using Transformers: Integrating Price, Sentiment, Trend, and Volume.

Projects

- Bitcoin Sentiment Analysis using roBERTa and Price Prediction with Temporal Fusion Transformers.
- Spatial Road Intelligence Mapping: Road Condition Detection using Computer Vision.
- Barcode Quality Assessment using Computer Vision.

Honors & Awards

- Gold Medal at the World Youth Invention and Innovation Award in the Technology Category.
- 2nd Place in The 14th Greenbase's Creative Video Contest by Institut Pertanian Bogor.
- 2nd Place in Advertising Video Contest Entrepreneur Day by Politeknik Negeri Semarang UKM Kewirausahaan.

Organizations

- Head of the Media and Information Department in the UIN Jakarta Mathematics Student Association.
- Head of Mathematics Computation Competition.
- Member of Data Science UIN Jakarta.

Other

Certifications

Certified International Specialist in Data Visualization by Pasas Institute, Data Science by IBM, Data Analytics by Google.

Programming Languages

Python, C, C++, R.

Technical Tools

Microsoft Excel, MySQL, Power Query, Power BI, Git.

Technical Skills

Data Structures and Algorithms, Object Detection, Natural Language Processing, Time Series Forecasting, Object Oriented Programming.
